SEDALIA, MO.

January 1st, 1903.

DEAR FRIENDS—With pleasure we present you with our **NEW GARDEN, FARM AND POULTRY ANNUAL** for 1903, describing **The Best Seeds and Bulbs Grown**, at right prices; also the most complete and largest stock of **POULTRY SUPPLIES** in the West. We thank our friends for their kindness and liberal orders in the past, solicit your future patronage and ask you to kindly have your friends send their orders with yours this season for **ARCHIAS' "SURE SEEDS" AND SUPPLIES**—a favor which we will appreciate. Wishing you a prosperous New Year, we are respectfully yours,

Q. C. Phone, 139. L. H. ARCHIAS. **ARCHIAS' SEED STORE.**
L. ARCHIAS.

Advantages We Offer to Customers:

Sedalia, with a population of about twenty thousand, is situated in one of the finest farming sections of Missouri, with good shipping facilities, low freight and express rates.

We have railroads running out in six directions, and about twenty mails daily.

WE OWN OUR STORE BUILDING and warehouse and have no rent to pay. Our cost for labor and advertising is about half that of houses in larger cities, therefore, we can sell the **best seeds grown** lower than other houses in our line.

OUR SEEDS ARE SELECTED especially to meet the demand of Market Gardeners and Good Farmers, and are good enough for anyone, this having been our business for nearly twenty years.

OUR RESPONSIBILITY—We refer, by permission, to the Citizens' National Bank or to any Express or Railroad Office in Sedalia. Thousands trust their orders with us each year.

FREE SEEDS—We will give away 100,000 packets free seeds to our customers for 1903 as premiums. The larger the order the more free seeds you get. Have your neighbors order with you. It will pay you.

CASH PRIZES—On page 2 we give a list of prizes offered to our customers this season. We will sell you only **THE FINEST SEEDS GROWN** and want you to raise big crops and fine specimens. This pays you, and advertises us. We want every one of our customers to compete for these prizes in 1903. A more complete list will be published in the catalogue of the Missouri State Fair, which which will be held at Sedalia next fall. Write the Secretary for a copy of the Fair Catalogue. We will publish a list of winners of our prizes in our 1904 catalogue.

WE DOUBLE TEST all Seeds, both as to vitality and purity, and we can conscientiously recommend Archias' Northern Grown "Sure Seeds" as Money Growers.

Best Mixture for a Beautiful Evergreen Lawn— Is a mixture of such grasses as will withstand the heat and dry weather of our summers.

The seed we offer is as pure and reliable as can be found anywhere.

To Produce a Good Lawn— Plow or dig up the surface thoroughly to a depth of 12 to 14 inches and mix the soil with well-rotted manure or our Helmet brand Lawn Fertilizer, the latter being at all times preferable, as it is more durable in its effects and free from weed seeds, which are always contained in more or less quantities in stable manure.

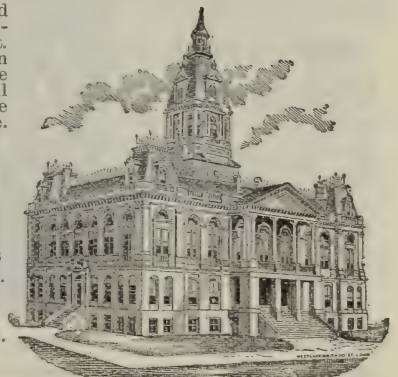

The soil should be well pulverized before sowing, and the lawn kept free from weeds the first season. The quantity of seed required is one pound to every 400 square feet. It will add \$500 to the value of any farm to have a nice lawn around the house. The most beautiful thing that can be placed about a home is a well kept lawn. POTTING SOIL—Best, Ready for Use. Peck 15c; One-half Bushel 25c; Bushel 40c.

Helmet Brand Complete Fertilizers

HERETOFORE the farmers in this vicinity have questioned the wisdom of the use of fertilizers, contending that fertilization was not essential to the growing of paying crops.

The intelligent and prosperous farmer of the present day is certain to be one who fully believes in and practices the excellent motto: **FEED THE SOIL AND THE SOIL WILL FEED YOU.** Crops cannot live and thrive on air and water alone. Their roots penetrate the earth and absorb therefrom the Nitrogen, Phosphoric Acid, Potash or other elements of plant life they require. In some form these must be replaced, otherwise the land would eventually revert to that deplorable condition usually described as "worn out."

We Guarantee All Our Helmet Brand Fertilizers to Be Made Wholly from Animal Flesh, Blood and Bone.

Stable manure is a true fertilizer—all of it is plant food, viz: Phosphoric Acid and Nitrogen, is available to the plants—but it cannot compare in strength with the Animal Fertilizers.

Stable manure contains 1,600 pounds of water to the ton, or more than ten times as much as the Animal Fertilizers.

It takes 30 to 40 cords of Stable Manure to equal the plant food found in 1 cord of Animal Fertilizers.

It takes vastly more labor to apply stable manure than to apply equal strength in Animal Fertilizers.

Stable manure for lawns is objectionable in appearance, odor, weed seed and cost. Our **Lawn Fertilizer** overcomes all these, and supplies the soil with requisite food for a luxuriant growth of grass. 10 lbs 40c, 25 lbs 75c, 50 lbs \$1.50, 100 lbs \$2.50.

Corn has been dethroned in Missouri. Chick-en is King! During the last twelve months the total shipment of poultry and eggs from Missouri has been \$12,571,467.83. This is an increase of almost \$500,000 over the previous year.

The State Labor Bureau has made some comparisons with these figures as a basis. Aggregating the shipments of wheat, corn, oats, flaxseed, rye, barley, timothy seed, clover seed, millet seed, cane seed, castor beans, broom corn, hay, straw and apples, and the Missouri hen beats the aggregation \$75,000.

Take all the products of forest and dairy and the barnyard is still ahead.

Combine the values of the products of the coal mines, the nurseries and the orchards, and the hen is nearly \$500,000 ahead.

Poultry and eggs equal in shipping value one-fifth the receipts from all the cattle, hogs, sheep, horses and mules. The drouth has not affected the hen. The hot weather has made her fruit scarce and hard to keep. But she is still very much alive and in earnest.

The harvest of the hen will do very much to offset the loss of the corn crop. Poultry has been regarded as one of the minor items in the farm products. The drouth may teach its importance and increasing value. If we cannot have roasting ears, there's yet fried chicken, and it isn't bad.—The Columbia Herald, of Columbia, Mo.

Fly Bouncer

WILL KEEP FLIES OFF STOCK. COSTS ¼ CENT PER DAY. It is not only the protection of the animal from the unendurable torment of flies, mosquitoes, lice, mites and other vermin, but it is money in your pocket to use Fly Bouncer. It is cheap as one gallon properly applied will keep twenty-five cows free from flies for one week at a cost of less than one-half cent per day each. The feed saved will more than pay the cost of the remedy and you do not have to wait until after dark to milk your cows.

By the use of Fly Bouncer during hot weather, your cow will give one-third more milk; your horse will rest during resting time and work during working hours on two-thirds the feed it now requires, and will be free from vermin of all kinds.

From a humane standpoint you should use Fly Bouncer on your stock; also as a good business venture as there is no doubt that it will pay handsomely for the cost of the remedy and the trouble of applying it. Qt 30c, 2 qts 55c, 1 gal \$1.00, 5 gal \$4.00. Results guaranteed.

SURE HATCH INCUBATORS!

Construction of the Sure Hatch Incubator.

The cases are made of California redwood, double walled throughout with heavy felt between the walls. Tests made side by side under trying circumstances show that our double walls with felt between form the best non-conductor of heat and cold that has been discovered.

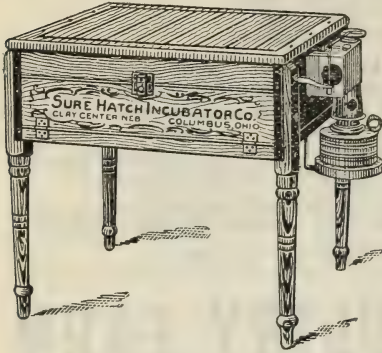

The bottom or floor of our Sure Hatch Incubator is of the same thickness as the side walls.

The cases are fitted with a copper pipe system; these pipes are made of 12 oz. cold rolled copper.

A pipe 1 1/4 inches in diameter makes an entire circuit of the egg chamber clear into all corners. From this 1 1/4 inch outward pipe, there are cross sections of one inch pipes so arranged that the distribution of heat is even over all the egg chamber.

It will be noticed that we have made provision for the lamp end of the machine; put enough more body of water at the opposite end to even up temperature over the eggs.

It will also be noticed that there can be no cold corners in the egg chamber fitted with this kind of copper pipe heating system.

SURE HATCH INCUBATOR.

Made in three sizes: 150-egg size, 100 egg size, 75-egg size. Either of the three sizes hold more than rated. For instance, the 150-egg machine will hold 175 Leghorn eggs; the 100-egg machine will hold 120 Leghorn eggs; 75-egg machine will hold 85 Leghorn eggs. The above cut represents our 150-egg machine. The other two sizes are exactly the same except in size; all made on the same pattern and finished exactly alike.

**A Mad
Hen**
 5555

No one would think of setting a hen on an elevated screen wire tray. If they did the hen would soon convince them it was foolish. The Sure Hatch Incubator is not built that way either. It is built on the hen's nest principle, and the eggs are incubated in the natural way.

The Sure Hatch Incubator contains other up-to-date practical features, several improvements not found in other incubators. They have a direct acting automatic regulator that is something entirely new. Its construction and simplicity carries conviction to anyone.

The Sure Hatch Incubators are built of California redwood, have copper tanks, safety lamps and all fixtures of first quality. They are a high grade machine at a low price.

The SURE HATCH INCUBATORS

Have recent improvements that put them ten years ahead; all old foggy, absurd things have been omitted.

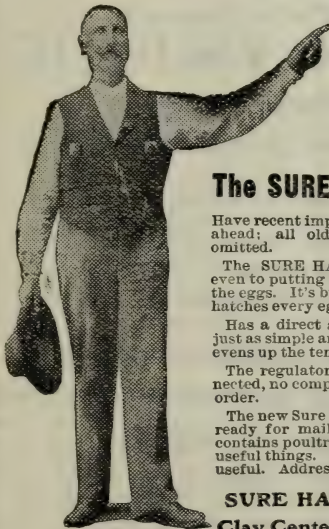

The SURE HATCH copies the natural method, even to putting the natural and necessary polish on the eggs. It's built on the hen's nest principle. It hatches every egg that can be hatched anyway.

Has a direct acting automatic regulator that is just as simple and sure as a doubletree on a wagon; evens up the temperature on the same principle.

The regulator comes already attached and connected, no complications to bewilder or get out of order.

The new Sure Hatch Incubator Catalogue is now ready for mailing. It's free to any address. It contains poultry and egg record table and a lot of useful things. No other Catalogue like it; none so useful. Address nearest house.
